Professional Summary

Java Backend Developer with 1.5+ years of experience designing and developing scalable backend systems and RESTful APIs using Java, Spring Boot, PostgreSQL, and Redis. Experienced in API design, database optimization, Docker, AWS cloud infrastructure, and CI/CD automation. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, System Design, and building reliable production-ready applications.

Technical Skills

Languages: Java, SQL

Backend Technologies: Spring Boot, Spring Security, REST APIs, JPA/Hibernate, API Design

Database: PostgreSQL

Caching: Redis

Cloud & DevOps: AWS (EC2, ECR, IAM, VPC, RDS, S3, Route53), Docker, GitHub Actions CI/CD

Tools: Git, Maven

Mobile: Flutter, Dart, Firebase

Computer Science: Computer Networks, Operating Systems, Database Management Systems, Object-Oriented Programming, System Design

Professional Experience

Associate Software Engineer
Ahex Technologies

Jan 2025 – Present

- Developed and maintained features for a cross-platform mobile application using Flutter and Dart, building responsive UI screens, custom widgets, and navigation flows.
- Implemented state management and handled API integration within the Flutter app to keep the UI in sync with backend data.
- Integrated Firebase services including Authentication, Firestore, and Cloud Messaging into the Flutter app to support real-time data sync and push notifications.
- Debugged and optimized Flutter app performance, fixing UI rendering issues and reducing screen load times.
- Designed and developed RESTful APIs using Java and Spring Boot, and collaborated with cross-functional teams through code reviews and Agile practices.

Projects

MediCore – Hospital Management System

May 2025 – Present

Java, Spring Boot, PostgreSQL, Redis, Docker, AWS

- Developed a scalable backend platform for managing patients, doctors, appointments, and medical records using Java and Spring Boot.
- Implemented Role-Based Access Control (RBAC) using Spring Security for Admin, Doctor, Receptionist, and Staff roles.
- Designed REST APIs with centralized exception handling, validation, and reliable API response mechanisms.
- Improved application performance using Redis caching and PostgreSQL indexing for optimized data retrieval.
- Deployed containerized backend services on AWS EC2 with RDS, S3, VPC, and Route53; automated deployments using CI/CD pipelines.

Education

Sreenidhi Institute of Science and Technology

2025

Bachelor of Technology (B.Tech), Computer Science & Engineering

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming, Computer Networks

Additional

Published a technical article on LinkedIn covering SOLID Principles and their practical application in enterprise Java development.
